

VOICECRAFT®

is coming to LONDON in 2017!

Expected Outcomes:

- Increased confidence in working with adults and children with complex voice disorder, and a range of professional voice users.
- Awareness of own vocal function and potential
- High level mastery of the 5 basic vocal skills
- Acquisition and application of high vocal intensity techniques and exploration of a range of specific stylistic alternatives for different voice user populations.
- Knowledge of a clinical reasoning paradigm for application of basic and advanced skills to populations of professional voice users & complex voice disorders.
